- College Notes Gallery is a web based notes sharing and management system which helps students and teachers to share their notes online effectively.
- It greatly overcomes the lack of availability and converts the manual old school paperwork to a fully automated and managed online system.
- College Notes Gallery allows it's users to securely register and log in to their individual accounts and create, read, update, delete notes according to their needs.
- It provides notes to everyone in a very secure manner.
- Multiple users can work in this system at the same time under centralized supervision by administrator.

The online note-sharing project is a web-based platform for sharing educational notes. It uses PHP and MySQL and allows users to sign up, access a personalized dashboard, download and peruse notes, upload their own, and manage profile details. The system also allows admin control, allowing them to delete accounts and review and approve notes for usability. Once approved, notes become accessible to all users within the corresponding faculty.
